ABOUT ME

I was born and raised in Beijing China. I first came to the US in 2018 and had been living and studying in California since.
While I studied psychology as an undergraduate, I am currently working towards a master's degree in computer science and aspiring to become a software engineer in the near future.
I have many go-tos in my leisure time. My favorite is bouldering right now.

Photo

- I came to study at University of California, San Diego in 2018 and received my Bachelor's degree in 2021.
- My major was Clinical Psychology and I also completed a minor in General Biology.
- My cumulative GPA was 3.9/4.0 and I received honors including Magna Cum Laude, Phi Beta Kappa and several-time Provost Honors.

- I began my study as an Align MS in Computer Science at Northeastern University in Silicon Valley in Spring 2023.
- My coursework include Foundations of CS, Discrete Structures, Data Structures and Algorithms, Object Oriented Programming, Web Development and Mobile App Development in iOS.
- My current GPA is 4.0/4.0.
- I also started working as Teaching Assistant in Fall 2023

Simple Bank Link to this project on Github

- The Simple Bank is a back-end web application that allows creating and managing accounts, recording all balance changes, performing money transfer transactions.
- Language and tools used in this project include: SQL, Docker, Golang, Gin, JWT, Kubernetes, etc.
- I am still actively developing this project and expect to finish it with in a few weeks.

More Projects will be developed

Climb Photo

- I got into rock climbing around one and a half years ago.
- I mostly do bouldering (highest grade sent - V6) and occasionally try top-roping.
- I haven't tried outdoor climbing on real rocks but plan to do so when there's right opportunity.

Ski Photo

- I'm rather new to snowboarding, having been on snow for only less than 10 times.
- In US, I have visited ski resorts in Portland and Salt Lake City and I will try somewhere else in this coming snow season.

Caligraphy Photo

- I started learning the Chinese Calligraphy when I was 8.
- While this skill is largely rusted, I still try to practice when I have time.
- This is probably the only thing that can connect me with art. I'm really bad at other forms of art, including music.
